EDUCATION

Govt. Woman Degree College

(2020 -2022)

FSC Pre-engineering

Govt. Graduate College , Samnabad Faisalabad

(2022 -2026)

Bachelor of IT

SKILLS

- HTML
- CSS with Framework Tailwind CSS
- React
- Node.js with Framework (Express.js)
- MongoDB
- Authentication sys

LANGUAGE

- English
- Urdu

PROFILE

I am a MERN Stack Developer skilled in MongoDB, Express.js, React.js, and Node.js. I build responsive web applications, RESTful APIs, admin dashboards, and authentication systems. I enjoy problem solving, learning new technologies, and improving my development skills continuously. I have a strong interest in creating clean user interfaces and scalable full-stack applications. As a fresher, I am passionate about gaining more experience, enhancing my coding abilities, and delivering efficient modern web solutions through teamwork and continuous learning.

PROJECT

FRONTEND

Developed multiple frontend projects using React.js, including a **Weather App**, Vegetable Website, and Travel Agency Website. These projects helped me improve my skills in responsive UI design, component-based development, API integration, routing, and creating modern user-friendly web applications.

MERN STACK

Developed a MERN Stack based **Student Attendance System** integrated with biometric face recognition technology. The project includes secure form authentication, role-based access control for admin, teachers, and students, along with attendance management features. It helped me strengthen my skills in full-stack development, authentication systems, database management, API integration, and building secure scalable web applications.
